Who we are looking for

Arc Hardware Incubator is running an intensive 4 week Pre Accelerator Program.

This intensive program is specifically designed for early-stage startups seeking pre-seed funding for their projects and in need of refining their innovations and developing a functional version of their products to be eligible to be accepted in an investment backed Accelerator program.

Participating teams will have the opportunity to engage with cutting-edge prototyping equipment and expertise in product development and commercialisation.

You will leave the program with a validated product and outlined business strategy!

Arc's Unique Hardware Resources

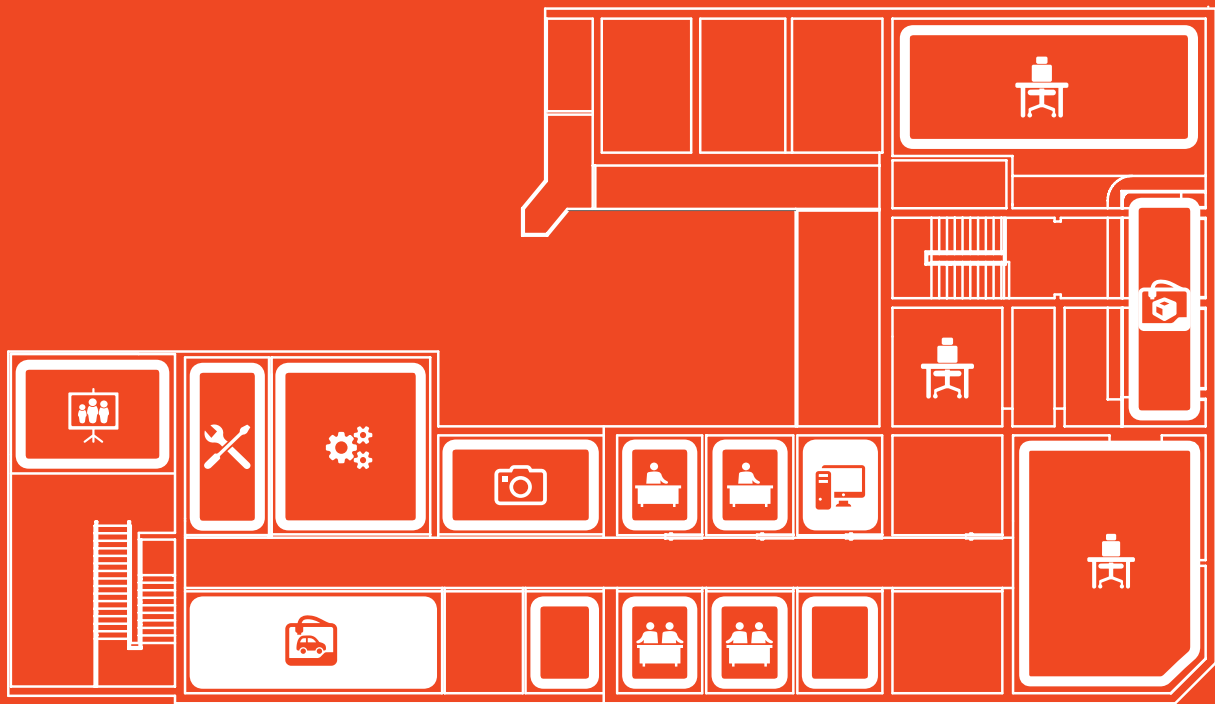

Having already set up a state-of-the-art facility, Arc is able to provide an unprecedented level of access to advanced prototyping and manufacturing equipment as well as a vast array of knowledge-based resources.

Combining high-level accelerator programs with such resources is the most cost-effective model to accelerate the development and scalability of innovative hardware startups. The resources made available by Arc include:

1. Prototype & Manufacturing Lab
2. MVP Lab
3. Electronics Lab
4. Post-processing & Assembly Lab
5. Media Lab
6. Co-working Space
7. Concept & Design Space
8. Networking
9. Investor Engagement
10. Educational Programs & Mentoring

Layout of Resources

Post Processing Lab

Media Lab

Prototype Lab

Private Cubicle

Meeting Room

MVP Lab

Coworking Space

Independent Office

Assembly Lab

Electronics Lab

Computer Lab

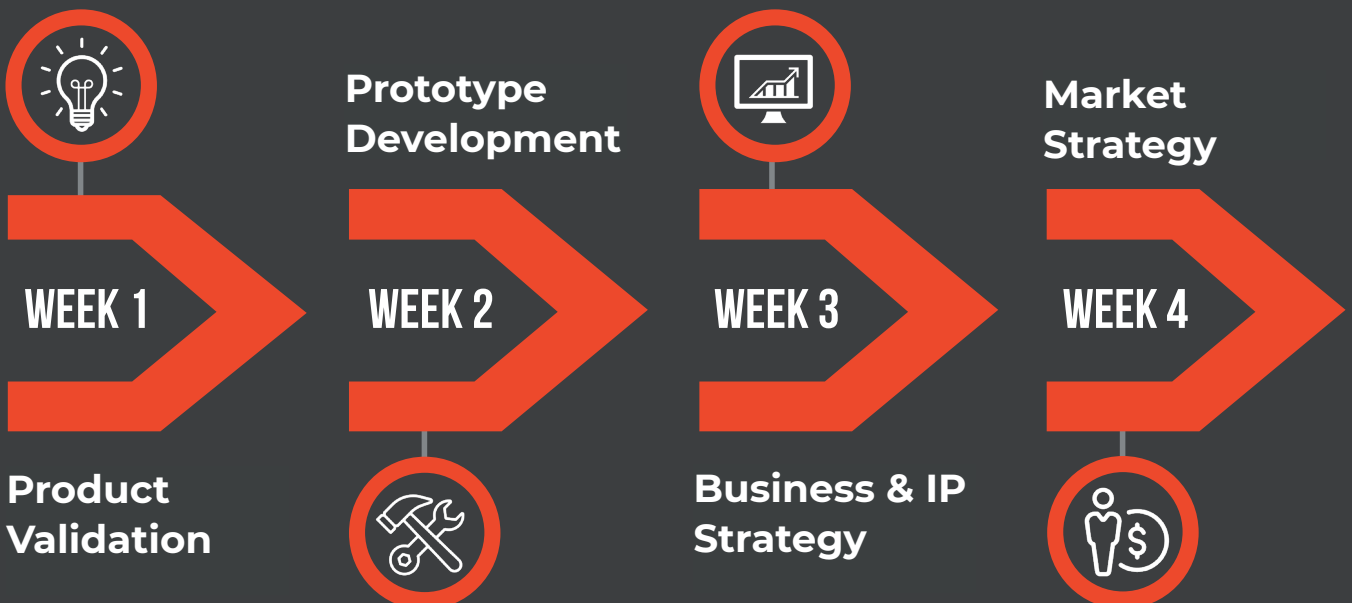

Casual Seating

Pre Accelerator - Key Information

Dates	Tuesday 2, 9, 16 and 23 April (5pm - 8pm)
Price	\$500 per team (up to 3 members) - payment plan available
Sponsored Placement	Top ranked applicant receives a sponsored placement in the program
Location	3/186 Brunswick St, Fortitude Valley

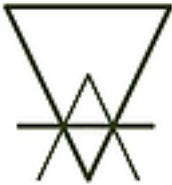

Application deadline
11:30pm on Sunday

17th March

Success Stories

Since participating in Arc's 2018 program, Augmented Bionics have been accepted in the Actuator Medtech Accelerator where they received Seed Funding.

AUGMENTED
B I O N I C S

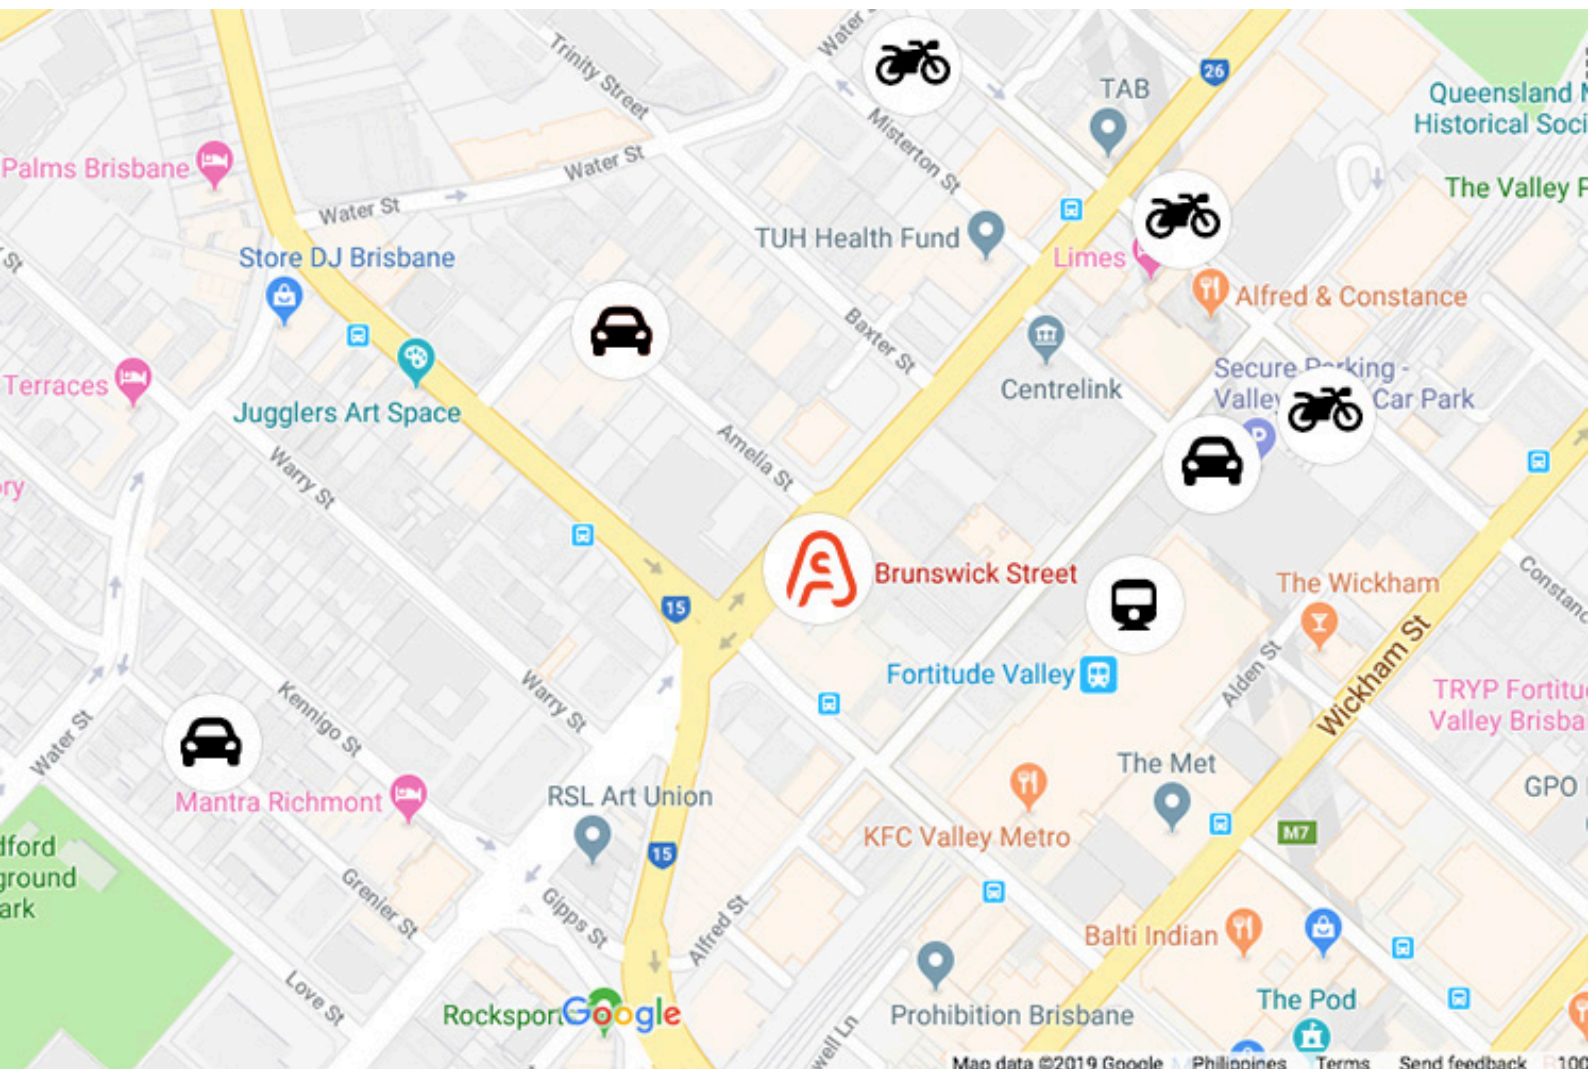

Smart Soil is in discussion with potential industry partners to start active trials.

Accessing Arc

Arc is located on St Pauls Terrace, across the road from Amelia St where onstreet parking is available for allocated time periods. Motorcycle parking can be found in multiple locations along Constance St and Secure parking is behind the Fortitude Valley train station located two blocks away from Arc.

JOIN THE HARDWARE REVOLUTION

Australian Government

This project is supported by the Australian Government Department of Industry, Innovation and Science through Incubator Support initiative funding as part of the Entrepreneurs' Programme
